WoO Craftsman Sprint Series 2018 Rules Bulletin #4

15.5.Y Radius Rods

All radius rods shall be constructed as a solid piece of round tubing with provision for a rod end on each end. Radius rods must be attached to the chassis and axle attachment points with said rod ends and no other devices between rod ends and attachment points will be allowed April 15, 2018. Devices that are designed to change the length of a radius rod in any way while the car is moving will not be allowed. Items such as but not limited to springs, air chambers and/or shock absorbers will not be allowed in any form on radius rods.
